

Stone Innovations  
INCORPORATED

## Cash and Carry Program

For the do it yourselfer who wants to save some money, we have the perfect program. Stone Innovations cash and carry program. You provide the templates, we do the manufacturing and you do the installation.

Open to everyone, not just wholesale customers! Look through the material that we have here in site or order what you need. Over 10,000 square feet of material in stock!

Bring us a layout of what you want us to manufacture, make your stone, edge polish, and other selections, we will generate a quote, if you like it, put money down and bring us your template or drawings to manufacture from.

When you bring in your templates, we will go through them with you and determine if any more information is needed.

We will get the information to our production office and they will fax you a production information sheet for a sign-off.

Once the materials are through manufacturing, we will give you a call to come and pick up your finished countertops.

When you pick up your tops, we will give you instructions on how to install them, we will color tint the seam epoxy for you, and load your stone on a transport A-frame. Bring the A-frame back when you are finished.

Granite weighs up to 20 lbs. per square foot, so make sure that you know what you are getting into before starting. Savings can be up to 50% off!
